WELCOME TO ROVASI

ROVASI DESIGNS AND MANUFACTURES ARCHITECTURAL AND TECHNICAL LIGHTING SOLUTIONS RANGING FROM INTERIOR LIGHTING FIXTURES TO COMPLEX EXTERIOR FIXTURES.

Since 1992 we design and produce fixtures that are ahead of constantly changing trends and demands, there are companies and professionals on five continents that place their trust in our products and count on ROVASI to carry out exciting projects.

Our mission is to fully satisfy our customers and the users of the lighting fixtures that we manufacture, and likewise, all those who participate in the lighting projects: lighting designers, lighting consultants, engineers, architects, interior designers.

First-rate quality, a comprehensive range of items, excellent service, substantial experience and elegant, functional design are the platform on which we have built our reputation.

Our dedication to service and technical support for our customers means that you will enjoy personalised attention and a rapid response. Working with ROVASI means that you can rely on people capable of providing an all-round service based on expertise and professionalism to meet your requirements promptly.

Our team of professionals is trained to offer quality service that is efficient and specialised, providing constant support in all stages of any project with an absolute guarantee of success. We are constantly on hand to offer advice in selecting the perfect luminaire.

Our pledge to do things properly and to satisfy the user has enabled us to secure long-lasting collaboration and to establish a commercial network throughout the five continents, and we are open to expand our circle of partners.

We work to play an active role in supporting lighting designers on an international scale.
IALD LIRC: Formed in 1996, the Lighting Industry Resource Council (LIRC) exists to provide a framework within IALD for enhanced communication between professional lighting designers and manufacturers and to create an environment conducive to the collaborative improvement of products, services, business practice and lighting design education.

We are members of the Design Cluster led by BCD Barcelona Design Center. Its aim is to foster actions that improve companies’ competitiveness by facilitating the development of innovative products and services through collaboration among various stakeholders: companies, institutions and knowledge centres located in Catalonia.

COMPANIES AND PROFESSIONALS ON FIVE CONTINENTS PLACE THEIR TRUST IN OUR PRODUCTS AND COUNT ON ROVASI TO ACCOMPLISH EXCITING PROJECTS.
QUALITY COMMITMENT

WE ARE CONSTANTLY MOTIVATED TO MAINTAIN AND INCREASE THE HIGH QUALITY THRESHOLD OF OUR LIGHT FIXTURES.

The quality of the lighting is an extremely important factor in any space. And the only way to create quality lighting is to use quality fixtures.

We are committed to total quality, and it is for this reason that the high quality of our luminaires stands out.

Always manufactured on our premises, with care lavished on every detail, our product line is made from the finest materials (die-cast aluminium, high purity aluminium, extruded aluminium, stainless steel 316L) and complies with the rigorous standards of nowadays regulations.

So, from our position of responsibility as manufacturers of light fittings, and using our know-how, we have developed our luminaires to ensure that the results of a lighting project meet even the most demanding requirements and completely satisfy our customers.

Our Technical Department always select the best electronic components for our lighting solutions. In this way, we have a full guarantee that all the fixtures we design and manufacture maintain the high quality standard that makes ROVASI lighting solutions stand out.

The quality of our products is translated into satisfaction, security and peace of mind once the project has been completed.
Prioritising lighting criteria, we create our luminaires with the best aesthetics to suit the characteristics of the project and the requirements of the lighting designer.

When working towards a new product, we explore different designs, dimensions and colours to create a functional fixture with a unique style that blends in with a specific architectural project. Our designs are created to satisfy the most demanding requirements.

Every single component of our luminaires has been rigorously selected by our technical team to create the highest quality lighting.

ROVASI luminaires are the perfect combination of design and lighting knowledge—an excellent marriage of technology and aesthetics. Thus, they give you total lighting control: high performance and high efficiency.

In creating a new product we take environmental criteria into account, then the result is always an environmentally friendly luminaire that is highly efficient, in order to guarantee low energy consumption.

Always on the lookout for ways to improve, we have a quality control system that guarantees the continuous professional monitoring of our products. We have been ISO certified since 1998 and are in compliance with the current ISO 9001 quality management standards for the design and manufacture of lighting equipment and fittings.

At ROVASI, we are aware of the importance of environmental issues. We know that any activity affects and conditions the life circumstances of people and society, both today and in the future, so we work day by day to ensure that our impact is as limited as possible. Our ISO 14.001 certification (since 2.009) guarantees that, we follow an efficient environmental management system.
WIDE RANGE OF LIGHTING SOLUTIONS

STANDARD CATALOGUE AND CUSTOM MADE LIGHTING SOLUTIONS

Selecting a luminaire that will enhance the style and suit the essence of a space is not always an easy task.

Because each project is unique and so requires a particular sort of fixture, we offer you more than 15,000 different references you can personalise with a large variety of finishes and more than 250 accessories, allowing you to find the one that best suits your needs. Furthermore, we can customise and adapt any luminaires to the characteristics of your project.

Beam angles, protection degrees, colour finishes, CRI, colour temperature are some different options that can be chosen. And we continue to work to constantly expand our product line.

In addition, thanks to the flexibility of our facilities in Centelles (Barcelona), our experienced staff and our expertise enable us to study the design and manufacture of custom-made lighting fixtures tailored to the requirements and needs of each individual project.

We can develop a custom-made lighting fixture from scratch just for your project.
CUSTOM MADE

YOUR WISH IS OUR COMMAND.
YOU HAVE AN IDEA, WE HAVE THE TOOLS.

Our technical team can create a solution suited to your individual project needs.

We have fully-equipped facilities, the necessary resources and experienced staff to manufacture custom-made solutions to order. Over the years, we have developed many custom-made fixtures in-house.

Our team takes part in all new product designs from the initial 3D drawings, to the corresponding prototypes and to the successful end product.

In collaboration with all the players participating in the lighting project (lighting designers, architects, engineers) we develop products tailored to the requirements and needs of the specific project. This may start with a simple functional description where we design and construct the product from the very beginning. In other cases the project is based on the client’s completed drawings or those of or an external designer.

We can make minor modifications to existing products or create completely unique products specific to your design criteria.
DOORS
OPEN WIDE

WWW.ROVASI.COM

The site has an easy-to-use drop-down menu where you can find the most suitable solution from our range.

It is a powerful way to browse through our collection of lighting solutions, making it easier for you to better understand our wide range of lighting options.

Our effective filter system will give you quick access to frequently requested information and technical files. As you browse through the product section, you will see there is plenty of downloadable information available, whenever you need it!

SHOWROOM

At your disposal is our showroom where we are delighted to show our LED lighting solutions for indoor and outdoor.

Fixtures are displayed to be shown close enough to observe all the details and quality of materials as well as the finishes and accessories from our entire range.

Our showroom is equipped with the latest technology in order to recreate different lighting scenarios. In our team, you will meet with expert lighting consultants to guide you on your visit, solving all your questions and offering the most suitable solutions for your projects.

TEKNO XS

Small recessed ceiling-mounted downlights with symmetrical light distribution to achieve an effective accent or general lighting.
Circular design available in small diameter: 55mm, 65mm or 85mm.
Fixed and tilt versions adjustable up to 20°. Available with 180° rotation.
Powder painted aluminium trim available in assorted finishes, customized RAL under request.
Remote driver included.
Passive temperature management: heat dissipation flows through an aluminium heat sink.
Ceiling-mounted with spring clamps for easy installation.

Suggested applications: apartments, shops, restaurants, hotels and similar installations.

ELECTRONIC OPTIONS

On/Off.
Phase Cut.
0-10V / 1-10V.
DALI/DSI/switchDIM/corridortFUNCTION.
Emergency Kit.

SPECIALS APPLICATIONS
TUNABLE WHITE
Recessed ceiling-mounted downlights with symmetrical light distribution to achieve an effective general lighting.

Circular design available in a diameter of 240mm.

High-purity anodised aluminium reflectors.

Double die-cast aluminium trim and glass diffuser with internal reflector to direct the light.

Powder painted exterior trim available in various finishes, customized RAL under request.

Flush painted glass diffuser attached to the reflector.

Tridonic remote driver included.

Passive temperature management: heat dissipation flows through aluminium heat sink diffuser.

Ceiling-mounted using galvanized steel support with screws.

Suggested applications: shopping malls, hotels, restaurants, shops, showrooms, religious buildings, banks and similar installations. To create a special lighting effect in any space. Really recommended in order to keep chains and franchisees corporate image helping in their brand recognition.

KEPLER SEAL

Recessed ceiling-mounted downlights with asymmetrical light distribution to achieve effective accent lighting.

Protection rating against dust and moisture: IP65 from underneath.
Circular design available in diameters 85mm.
Internal cylindrical aluminium black baffle for minimal glare.
Deep regressed light source to ensure visual comfort. Slot interior aperture.
Powder painted trim available in assorted finishes, customized RAL under request.
Flush glass and silicone gaskets to ensure IP65 protection from underneath.
Tridonic remote driver included. Passive temperature management: heat dissipation flows through an aluminium heat sink diffuser.
Ceiling-mounted using galvanised steel support with spring clamps.

Suggested applications: bathrooms, spas, porches, balconies and similar high humidity environments.

BSM SEAL

Recessed ceiling-mounted downlights with symmetrical light distribution to achieve task, accent or general lighting.
Circular design with trimless appearance. Available in 2 diameters: 120mm and 151mm.
Protection rating against dust and moisture: IP65 from underneath.
Aluminium trim and interior circle powder painted in various finishes, customized RAL under request.
To complete the effect of this fixture, it is also recommended that the inner ring should be painted the same RAL colour as the ceiling.
High purity anodised aluminium reflector in various finishes: specular or sandblasted depending on the beam angle outcome.
Interior trim of die-cast aluminium and tempered flush glass sealed with a silicone gasket.
Tridonic remote driver included.
Passive temperature management: heat dissipation flows through an aluminium heat sink.
Ceiling-mounted using galvanized steel support with spring clamps.

Suggested applications: kitchens, bathrooms, spas, porches, balconies and similar high humidity environments. Designed to create an exclusive and clean flush installation.

GOTA

Surface mounted downlights with symmetrical light distribution to achieve an effective task, accent or general lighting.

Neutral cylindrical body available in 4 diameters: 60mm, 80mm, 90mm and 120mm.

Extensive range of reflectors to achieve the best photometric results.

Aluminium reflectors in various finishes: facetted metalized or sandblasted anodised depending on the beam angle outcome.

Powder painted aluminium profile available in various finishes, customized RAL under request.

Built-in Tridonic driver.

Passive temperature management: heat dissipation flows through an aluminium heat sink and the fixture body itself.

Mounting to the ceiling plate with two securing points. Cable entry from the top of the fixture.

GOTA can be combined with the KERI pendant line and the ROCKET wall mounted fixtures to get a harmonious finish.

Suggested applications: retail, residences, hotels, bars, restaurants and similar installations.
**BASE**

Surface mounted downlights with symmetrical light distribution to achieve task, accent or general lighting.

Neutral cylindrical body available in 6 diameters: 150mm, 190mm, 220mm, 235mm, 240mm and 260mm.

Extensive range of reflectors to achieve the best photometric results.

High-purity aluminium reflectors in various finishes: faceted metalized or sandblasted anodised depending on the beam angle outcome.

Powder painted aluminium profile available in various finishes, customized RAL under request.

Built-in Tridonic driver.

Passive temperature management: heat dissipation flows through an aluminium heat sink diffuser and the fixture body itself.

Mounting to the ceiling plate with two securing points. Cable entry from the top of the fixture.

BASE can be combined with the GRAVITY pendant line to get a harmonious finish.

**Suggested applications:** shopping malls, hotels, offices, airports, service stations, restaurants, shops, workplaces, universities, conference halls, meeting rooms and similar installations. Solution for solid ceilings.

Suggested applications: residences
Suggested applications: residences
Lighting not only fills the dark but, it often does a much more relevant task: giving meaning, emphasis and an accent to that which is being illuminated.

For this reason, the light intensity, efficiency and degree of aperture is as important in lighting design as the temperature colour, chromatic tolerance or CRI of the light source.

This line of our range features special modules as the ideal solution for specific projects in shops, museums or exhibits. These modules are available for ATOMIC, CELL, QUADRATIC, ACTIVO, DYNAMIC, FOCUS, BSM and BSQ.

**Suggested applications:** bakery, fishshops, charcuterie, delicatessen, retail, showrooms, museums and exhibitions.
YOUR PERFECT WHITE

Luminaires have to be capable of meeting lighting needs efficiently and effectively responding to the characteristics of the activity to be done in a specific area, the occupants and the architecture of the place.

Proper lighting can enhance task performance, improve the appearance of an area and have positive psychological effects on users.

However, it is often frequent that the action performed in a place and also the people may change along the day; this will involve consequent modifications in illumination.

Nowadays flexible lighting is always indispensable.

TUNABLE WHITE solution show their strengths in different spaces and for different purposes:

Work places and offices: increases productivity. Different colour temperatures or intensity can be selected according to the office schedule, the weather, the day light or the necessary attentiveness in the activity.

Hotel and halls: provides comfortable and relaxing ambiance in hotel/hospital/building lobbies combining it with the day light or the weather.

Conference rooms and auditoriums: facilitates optical separation from one activity to the next one. It is possible to associate the general lighting to the show (classic music recital versus modern music concert).

Restaurants: adapts the lighting according to the food served, the area of the restaurant, the meal, guest profile or aim of the meal.

Multipurpose spaces: it helps to create flexible areas and scenes, e.g. aerobic versus meditational or relax activities.

TUNABLE WHITE modules are available for ATOMIC and FOCUS lighting fixtures in diameter 190mm and 220mm. They are also available for KUU, CANDRA, LEDA, PLACE and TOP.

DALI/DSI/switchDIM/colourSWITCH.

Through a pushbutton or through control via DALI it is possible to change the colour temperature from 2700K to 6500K white. There are 8 standard positions:

- 2700K
- 3000K
- 3500K
- 4000K
- 4500K
- 5000K
- 5700K
- 6500K

In addition, if the lighting installation is controlled via DALI, it is possible to configure individual light colours along the Planckian curve by introducing the colour coordinates (x,y).

The coordinates should always be inside the triangle indicated in this Planckian curve. As further away is the coordinate of the Planckian curve, as much could defer the lumen level obtained.

It is possible to memorize until 8 different scenes, so 8 coordinates.

DALI/DSI/switchDIM/colourSWITCH.

Through a pushbutton or through control via DALI it is possible to change the colour temperature from 3000K to 6000K white. There are 7 standard positions:

- 3000K
- 3500K
- 4000K
- 4500K
- 5000K
- 5500K
- 6000K

SPL
more information rovasi.com
**WARM WHITE**

Sunset LED modules creates an intimate atmosphere and comes close to reproducing familiar light of incandescent lamps.

The new module has been designed for specific areas of application such as hospitality and spa industries but, of course, it can be used in a home environment as it creates a particularly cozy atmosphere.

With a colour temperature of 2700 K, the module offers a warm light similar to that from an incandescent lamp and projects a pleasant and relaxing atmosphere.

When dimmed, the light produces a more intimate light level with a colour temperature range from 2700 K to 1800 K when dimming from 100 percent to 5 percent.

This makes it possible for SUNSET to be simulated as desired or for a candlelight effect to be produced.

These modules are available for MINIDOWNLIGHTS, SMALL RECESSED DOWNLIGHTS and IP65 SMALL RECESSED DOWNLIGHTS.

**Suggested applications:** pubs, bars, restaurants, residences and hotels.

Recessed linear downlights with symmetrical light distribution to achieve an effective task or general lighting.
GREENWICH PLUS

Recessed ceiling mounted linear downlights with symmetrical light distribution to achieve an effective task or general lighting.

Linear fixtures available in 5 lengths 597mm, 884mm, 1170mm, 1457mm and 2891mm in a width of 84mm.

Powder painted extruded aluminium profile available in assorted finishes, customized RAL under request.

Range of PMMA optics to achieve specific photometric results.

Highly efficient linear printed circuit board.

Built-in driver.

Passive temperature management.

Ceiling-mounted using steel support with screws.

Matching products:
- HORIZON PLUS frameless recessed.
- MERIDIAN PLUS surface mounted.
- RULE PLUS pendant.
- GREENWICH PLUS WW as wallwasher.

Suggested applications: shopping malls, hospitals, laboratories, warehouses, industrial facilities, schools and universities, offices, retail, showrooms, leisure facilities, gyms and similar installations.

SURFACE MOUNTED LINEAR DOWNLIGHTS

Suggested applications: auditoriums, conference centers.

Suggested applications: corridors.
SWING

Pendant linear downlights with symmetrical light distribution to achieve an effective task or general lighting.

Linear fixtures available in 5 lengths 566mm, 846mm, 1126mm, 1406mm and 2806mm and in a width of 40mm.

Powder painted extruded aluminium profile available in assorted finishes, customized RAL under request.

Opal extruded polycarbonate diffuser.

Highly efficient linear printed circuit board.

Built-in Tridonic driver.

Passive temperature management.

Ceiling-mounted with adjustable steel wire suspension (1 m) and transparent electrical wire. Different suspension length on request.

Matching products:

· VIA recessed.
· NUOLI frameless recessed.
· TIRET surface-mounted.
· VLAK pendant double emission.
· JOON and LIFT wall-mounted.

Suggested applications: private residences, offices, schools and universities, retail, showrooms, galleries, museums, conference halls, meeting rooms, banks, bars, restaurants, hotel receptions and similar installations. A good solution for high ceilings because it enables the lighting fixture to be brought near where there needs to be.

WALL-MOUNTED LINEAR FIXTURES

JOON

Wall-mounted linear downlights or uplights with symmetrical light distribution to achieve an effective task or general lighting. Linear fixtures available in 5 lengths: 566mm, 846mm, 1126mm, 1406mm and 2806mm and in a width of 40mm. Powder painted extruded aluminium profile available in assorted finishes, customized RAL under request. Opal extruded polycarbonate diffuser. Highly efficient linear printed circuit board. Built-in Tridonic driver. Passive temperature management. Wall mounted by mounting brackets.

Matching products:
- VIA recessed.
- NUOLI frameless recessed.
- SWING and VLAK pendant.
- LIFT wall-mounted.

Suggested applications: private residences, offices, schools and universities, retail, showrooms, galleries, museums, conference halls, meeting rooms, banks, bars, restaurants, hotel receptions and similar installations.

**ELECTRONIC OPTIONS**

On/Off, DALI/DSI/SwitchDIM/corridorFUNCTION. Emergency Kit.

**ACCESSORIES AND FINISHES**

On rovasi.com for more information.
Luminaires have to be capable of meeting lighting needs efficiently and effectively responding to the characteristics of the activity to be done in a specific area, the occupants and the architecture of the place.

Proper lighting can enhance task performance, improve the appearance of an area and have positive psychological effects on users.

However, it is often frequent that the action performed in a place and also the people may change along the day; this will involve consequent modifications in illumination.

Nowadays flexible lighting is always indispensable.

TUNABLE WHITE solution show their strengths in different spaces and for different purposes:

Work places and offices: increases productivity. Different colour temperatures or intensity can be selected according to the office schedule, the weather, the day light or the necessary attentiveness in the activity.

Hotel and halls: provides comfortable and relaxing ambiance in hotel/hospital/building lobbies combining it with the day light or the weather.

Conference rooms and auditoriums: facilitates optical separation from one activity to the next one. It is possible to associate the general lighting to the show (classic music recital versus modern music concert).

Restaurants: adapts the lighting according to the food served, the area of the restaurant, the meal, guest profile or aim of the meal.

Multipurpose spaces: it helps to create flexible areas and scenes, e.g. aerobic versus meditational or relax activities.

These modules are available for VIA, NUOLI, TIRET, SWING, VLAK, JOON and LIFT from 862mm.

DALI/DSI/switchDIM/colourSWITCH.

Through a pushbutton or through control via DALI it is possible to change the colour temperature from 2700K to 6500K white.

There are 8 standard positions:

- 2700K
- 3000K
- 3500K
- 4000K
- 4500K
- 5000K
- 5700K
- 6500K

In addition, if the lighting installation is controlled via DALI, it is possible to configure individual light colours along the Planckian curve by introducing the colour coordinates \((x, y)\).

The coordinates should always be inside the triangle indicated in this Planckian curve. As further away is the coordinate of the Planckian curve, as much could defer the lumen level obtained.

It is possible to memorize until 8 different scenes, so 8 coordinates.
MODULAR SYSTEMS

1 LINE

Standard lengths are 582mm, 862mm, 1142mm, 1422mm and 2822mm. There is no limit on length for connection junctions so, you may customise the length to meet your needs.

PCB: Tridonic GmbH & co KG

1 LINE

Standard lengths are 592mm, 873mm, 1154mm, 1435mm and junctions so, you may customise the length to meet your needs.

PCB: Vossloh-Schwabe Deutschland GmbH

3 LINES

Standard lengths are 597mm, 884mm, 1170mm, 1457mm and 2891mm. There is no limit on length for connection junctions so, you may customise the length to meet your needs.

PCB: Vossloh-Schwabe Deutschland GmbH

COMPOSE YOUR SYSTEM

You can combine different lengths and junction modules in different ways to create your system.

Available for surface mounted and pendant families.

HORIZONTAL CORNER 90º
Available for VIA, NUOLI, TIRET, SWING and VLAK.

T MODULE
Available for VIA, NUOLI, TIRET, SWING and VLAK.

X MODULE
Available for VIA, NUOLI and TIRET.

INTERIOR CORNER WALL/CEILING 90º
Available for VIA, NUOLI and TIRET.

EXTERIOR CORNER WALL/WALL 90º
Available for VIA, NUOLI and TIRET.
MODULAR SYSTEMS

LENGTHWISE JUNCTIONS
Available for all linear system families

SUSPENSION ROD
Available for RULE, RULE PLUS, RULE WW and RULE PLUS WW.

3 PHASE TRACK ADAPTER
Available for MERIDIAN, MERIDIAN PLUS, MERIDIAN WW, MERIDIAN PLUS WW, RULE, RULE PLUS, RULE WW and RULE PLUS WW.

CORNER JUNCTIONS
Available for linear fixtures with optics with recessed, surface mounted and pendant installation.

T JUNCTIONS
Available for linear fixtures with optics with recessed, surface mounted and pendant installation.

INTERSECTION JUNCTIONS
Available for linear fixtures with optics with recessed, surface mounted and pendant installation.
Recessed ceiling-mounted downlights with symmetrical light distribution.
Circular design available in 4 diameters: 165mm, 200mm, 225mm and 250mm.
Protection rating against dust and moisture: entire IP65. Protection rating for resistance to harmful mechanical impacts: IK07.
High-purity aluminium reflectors available in various finishes: specular anodised, facetted metalized or sandblasted anodised depending on the beam angle outcome.
Aluminium body treated against corrosion and coated with polyester powder painting.
Exterior screws and trim made of 316L stainless steel marine grade.
5mm tempered protection glass clear as standard. Temperature resistant silicone rubber gasket.
Anti-condensation device.
Tridonic remote driver included.
Passive temperature management: heat dissipation through aluminium heat sink.
Mounted to the ceiling by three fixing points.

Suggested applications: white rooms, laboratories, warehouses, leisure areas, service stations, industrial facilities, high humidity outdoor spaces or spaces that require low-maintenance.

**WATERTIGHT SQ**

Recessed ceiling-mounted downlights with symmetrical light distribution.

Square design in dimensions 258mm x 258mm and 318mm x 318mm.

Protection rating against dust and moisture: entire IP65.

Protection rating for resistance to harmful mechanical impacts: IK07.

High purity matt anodised aluminium reflector.

Die-cast aluminium body treated against corrosion and coated with polyester powder painting.

5 mm tempered protection glass clear as standard, other finishes under request.

Exterior screws and cover made of 316L stainless steel marine grade.

Temperature resistant silicone rubber gasket.

Anti-condensation device.

Built-in Tridonic driver.

Passive temperature management: heat dissipation through the fixture body itself.

Mounted to the ceiling by four fixing points.

**Suggested applications:** white rooms, laboratories, porches, shopping malls, warehouses, leisure areas, service stations, industrial facilities, high-humidity outdoor spaces or interior spaces that require low-maintenance.

**ELECTRONIC OPTIONS**

- On/Off.

[WATERTIGHT SQ](#)
Recessed ceiling-mounted downlights with symmetrical light distribution. Circular design available in 4 diameters: 165mm, 200mm, 225mm and 250mm. Remarkable low height: 65mm or 100mm. Protection rating against dust and moisture: entire IP65. Protection rating for resistance to harmful mechanical impacts: IK07. High-purity sandblasted anodised aluminium reflector. Aluminium body treated against corrosion and coated with polyester powder painting. 5 mm tempered protection glass clear as standard. Exterior screws and cover made of 316L stainless steel marine grade. Temperature resistant silicone rubber gasket. Anti-condensation device. Tridonic remote driver included. Passive temperature management: heat dissipation through aluminium heat sink diffuser. Mounted to the ceiling by three fixing points.

**Suggested applications:** white rooms, laboratories, porches, shopping malls, warehouses, leisure areas, service stations, industrial facilities, high-humidity outdoor spaces or interior spaces that require low-maintenance. Ceilings with shallow voids.

**WATERTIGHT SHALLOW**

Waterproof recessed downlights with symmetrical light distribution.

Circular design available in 4 diameters: 165mm, 200mm, 225mm and 250mm. Remarkable low height: 65mm or 100mm. Protection rating against dust and moisture: entire IP65. Protection rating for resistance to harmful mechanical impacts: IK07. High-purity sandblasted anodised aluminium reflector. Aluminium body treated against corrosion and coated with polyester powder painting. 5 mm tempered protection glass clear as standard. Exterior screws and cover made of 316L stainless steel marine grade. Temperature resistant silicone rubber gasket. Anti-condensation device. Tridonic remote driver included. Passive temperature management: heat dissipation through aluminium heat sink diffuser. Mounted to the ceiling by three fixing points.

**Suggested applications:** white rooms, laboratories, porches, shopping malls, warehouses, leisure areas, service stations, industrial facilities, high-humidity outdoor spaces or interior spaces that require low-maintenance. Ceilings with shallow voids.
OYSTER

Vandal-resistant recessed mounted fixture for wall or ceiling with symmetrical light distribution.

Circular design available in 2 diameters: 300mm and 380mm.

Protection rating against dust and moisture: entire IP65.

Protection rating for resistance to harmful mechanical impacts: IK10.

Robust body made of die-cast aluminium, treated against corrosion and coated with polyester powder painting. Aluminium trim available in assorted colour finishes, customized RAL under request.

High purity sandblasted anodised aluminium reflector.

Impact resistant cover made of clear polycarbonate.

Temperature resistant silicone rubber gasket.

Anti-condensation device.

Built-in Tridonic driver.

Passive temperature management: heat dissipation through the fixture body itself.

Mounting to the ceiling by three securing points. Recessing case included. Cable entry from the top of the fixture.

Suggested applications: indoor and outdoor spaces in schools, sport areas, healthcare centers, car parks and similar installations.

LITHOS

Recessed buried uplight with symmetrical light distribution.

Circular design available in two diameters: 285mm and 368mm.

Its main feature is its low depth: 104mm or 120mm.

IP68 protection rating that enables it to resist immersion to a depth of 1m.

Protection rating for resistance to harmful mechanical impacts: IK10. Load supported: 2900Kg or 3800Kg.

Robust and corrosion-resistant because of its 18μ anodised aluminium housing and 316L stainless steel marine grade trim and screws.

High purity sandblasted anodised aluminium reflector to get the best photometric results.

15 mm tempered protection glass clear as standard.

Temperature resistant silicone rubber gasket.

Built-in Tridonic driver.

Passive temperature management: heat dissipation through the fixture body itself.

Supplied with aluminium insertion tube as standard. Ground mounted by two fixing holes. Double cable gland entry for installation in series. Pre-wiring of 1.5 metres cable 3x1.5mm². IP68 connector to be ordered separately.

Suggested applications: gardens, parks, pathways that may be affected by temporary flooding. Shopping malls, hotel and building entrances, cinemas, car parks, garages, showrooms and similar installations. Suitable for installation in concrete, pavement and lawn. Floors where there is not much depth for a recessed installation.
Suggested applications: residences

Medina Centrale The Pearl. Doha, Qatar

Palmerale Golf Palace. Marrakech, Morocco
Aspire Tower. Doha, Qatar

Grand Palace Landscape. Bangkok. Thailand

Riyadh Park Mall. Riyadh. Saudi Arabia
PIVOT

Semi-recessed buried fixture with grazing light distribution to achieve an effective inground illumination.

Circular design available in a diameter of 235mm. 

IP68 protection rating that enables it to resist immersion to a depth of 1m.

Protection rating for resistance to harmful mechanical impacts: IK10. Load supported: 4100Kg and 6000Kg.

Robust and corrosion-resistant because of its 18μ anodised aluminium housing. Cover made of die-cast aluminium treated against corrosion and coated with polyester powder painting available in several colour finishes, customized RAL under request.

1, 2, 3 or 4 light sectors.

High purity sandblasted anodised aluminium reflector.

Temperature resistant silicone rubber gasket.

Built-in Tridonic driver.

Passive temperature management: heat dissipation flows through the fixture body itself.

Supplied with aluminium insertion tube as standard. Ground mounted by two fixing holes. Double cable gland entry for installation in series. Pre-wiring of 1.5 metres cable 3x1.5 5mm². IP68 connector to be ordered separately.

**Suggested applications:** gardens, parks, pathways, hotel and building entrances that may be affected by temporary flooding. Suitable for installation in concrete, pavement and lawn.

EXTENDED GUARANTEE

At ROVASI, we are committed to total quality, and it is for this reason that the high quality of our luminaires stands out. Always manufactured on our premises, with care lavished on every detail, our product line is made from the finest materials (die-cast aluminium, high purity aluminium, stainless steel 316L) and complies with the rigorous standards of today’s regulations.

Our Technical Department, always select the best electronic components for our lighting solutions. In this way we have a full guarantee that all the luminaires we design and manufacture maintain the high quality standard that makes ROVASI lighting solutions stands out.

After strict temperature checks, all our LED products are below the maximum Tc indicated by the manufacturers of LED modules, offering a highly efficient product and ensuring a long life for the LED.

Because we want to share and transmit the benefits of this quality commitment with all our customers, we place at your disposal a guarantee extension for 5 years that cover all the luminaires in our LED range. The guarantee extension conditions are available at www.rovasi.com.

The quality of our products is translated into security and peace of mind once the project has been completed.

PHOTOMETRIC DATA

There is available photometric data in IES and EULUMDAT formats. In our web site it is possible to download the file for each reference, a pack for a specific product family or for the whole ROVASI range.
